NP(Nano Protect) is

- Best for impact protection and absorption.
- NP is divided NP10, NP20, NP30 for custom usage.
- NP10 will protect arms, legs, fingers, ankle, knees
- NP20 protects larger body part - chest, waist, back, shoulder
- NP30 will safeguard the head from impact

NP Markets

NP technologies can be used for impact protection in any industry including Sports, and all your daily life activities.

- **Motocycle(riders)**
- **Sports**
- **Industrial**
- **Daily life**

NP Technology

- Using EVA(Ethylene-Vinyl Acetate) allows for no change in shape and is recyclable.
- Non-Toxic Design is safe for everyday professional use.
- Highly flexible, ergonomic design and Longitude setting based on ergonomic design.

- **Permanent Use** NP products are highly durable and designed for long time usage.
- **Maintain Configuration(Shape)** NP maintains the configuration and shape of the protector permanently.
- **Preservation** NP preservatives ensure consistent protection performance
- **Impact Dispersion** Our unique technology evenly distributes and absorbs impacts to the user.
- **Impact Absorption** Despite its slim size and light weight, NP's unique impact absorption technology shows excellent impact absorption capabilities.
- **Recycle** NP is environmentally friendly and made of 100% recyclable materials.
